Presence Questionnaire

Based on Witmer, B. G., & Singer, M. J. (1998) Measuring Presence in Virtual Environments: A Presence Questionnaire. *Presence, 7*(3), 225 – 2240. https://doi.org/10.1162/105474698565686

1. How much were you able to control events?

Not at all			Moderate			Very much

2. How responsive was the environment to actions that you initiated (or performed)?

Not at all			Moderate			Very much

3. How natural did your interactions with the environment seem?

Not at all			Moderate			Very much

4. How completely were *all* of your senses engaged?

Not at all			Moderate			Very much

5. How much did the visual aspects of the environment involve you?

Not at all			Moderate			Very much

6. How natural was the mechanism which controlled movement through the environment?

Not at all			Moderate			Very much

7. How natural was the mechanism which controlled movement through the environment?

Not at all			Moderate			Very much

8. How aware were you of events occurring in the real world around you?

Not at all			Moderate			Very much

9. How aware were you of your display and control devices?

Not at all			Moderate			Very much

10. How compelling was your sense of objects moving through space?

Not at all			Moderate			Very much

11. How inconsistent or disconnected was the information coming from your various senses?

Not at all			Moderate			Very much

12. How much did your experiences in the virtual environment seem consistent with your real-world experiences?

Not at all			Moderate			Very much

13. Were you able to anticipate what would happen next in response to the actions that you performed?

Not at all			Moderate			Very much

14. How completely were you able to actively survey or search the environment using vision?

Not at all			Moderate			Very much

15. How well could you identify sounds?

Not at all			Moderate			Very much

16. How well could you localize sounds?

Not at all			Moderate			Very much

17. How well could you actively survey or search the environment using touch?

Not at all			Moderate			Very much

18. How compelling was your sense of moving around inside the virtual environment?

Not at all			Moderate			Very much

19. How closely were you able to examine objects?

Not at all			Moderate			Very much

20 How well could you examine objects from multiple viewpoints?

Not at all			Moderate			Very much

21. How well could you move or manipulate objects in the virtual environment?

Not at all			Moderate			Very much

22. To what degree did you feel confused or disoriented at the beginning of breaks or at the end of the experimental session?

Not at all			Moderate			Very much

23. How involved were you in the virtual environment experience?

Not at all			Moderate			Very much

24. How distracting was the control mechanism?

Not at all			Moderate			Very much

25. How much delay did you experience between your actions and expected outcomes?

Not at all			Moderate			Very much

26. How quickly did you adjust to the virtual environment experience?

Not at all			Moderate			Very much

27. How proficient in moving and interacting with the virtual environment did you feel at the end of the experience?

Not at all			Moderate			Very much

28. How much did the visual display quality interfere or distract you from performing assigned tasks or required activities?

Not at all			Moderate			Very much

29. How much did the control devices interfere with the performance of assigned tasks or with other activities?

Not at all			Moderate			Very much

30. How well could you concentrate on the assigned tasks or required activities rather than on the mechanisms used to perform those tasks or activities?

Not at all			Moderate			Very much

31. Did you learn new techniques that enabled you to improve your performance?

Not at all			Moderate			Very much

32. Were you involved in the experimental task to the extent that you lost track of time?

Not at all			Moderate			Very much
